

ProtoSpace Manufacturing  
P.O. Box 81, 46 Wabana Court  
Sydney, NS B1P 6R7

## **REACH 233 Compliance Statement**

Approximately every 6 months, the European Chemicals Agency (ECHA) will update the REACH Candidate List.

In each update, a number of new Substances of Very High Concern (SVHCs) may be added. The total number of SVHCs on the Candidate List may increase on a regular basis.

Currently this number of substances is set at 233, as of January 17, 2023.

ProtoSpace Manufacturing, a division of Protocase Inc., is in full compliance with this requirement as it pertains to its own internal processes.

ProtoSpace Manufacturing can be fully compliant with respect to its material supply chain upon request.
